MIT Center for Transportation & Logistics

Supply Chain Visualization Analytics Roundtable

AGENDA   *MIT Faculty Club, June 27th 2013*

8:00   *Registration & Continental Breakfast*

8:30   *Introductions, Ground Rules & Opening Remarks*
We open the Roundtable by providing the ground rules

9:00   *Session I – Visual Dashboards*
What is the value of using visual dashboards in tracking Supply Chain performance metrics?

9:45   *Session II – Visualization & Optimization*
Companies regularly optimize the flow of products across their supply chains. How do they visually communicate these results across the organization? What is working, what is not?

10:30   *Break*

11:00   *Session III – SC Operations & Visualization*
What is the role of visualization in real-time/detailed analysis of supply chain operations? Are there successful examples?

11:45   *Session IV – Building a Visualization Analytics Team*
What skills are needed to build a successful visualization team? How should it be organized?

12:30   *Lunch*

1:30   *Session V – Supply Chain Visualization Software*
Invited vendors & practitioners will showcase tools that support visual analysis of supply chain operations.

2:30   *Session VI – Visualization in Other Fields*
Invited experts in non-supply chain areas, will share examples on how visual analysis is changing their fields.

3:30   *Wrap Up and Next Steps*
Collect insights from the day and determine next steps.

4:00   *Adjourn*
