Women in Supply Chain Summit: Achieving Balance in SCM  
Hosted by Converse

1 Lovejoy wharf Boston, MA  March 26-27 2019

Engineering and Supply Chain Management have traditionally been male dominated fields. This is slowly changing and according to a survey done by Gartner the average percentage of women in Supply Chain roles has increased from 35% to 37% over a three-year period from 2016-2018. The goal of this roundtable is to bring the Supply Chain community together so that they might share in the insights, experiences and knowledge of inspiring women who are leaders in their industries and in their supply chain roles. Through the sharing of these lessons and experiences we will develop best practices ensure continued growth in attracting and retaining women into the Supply Chain field.
